DETAILED ACTION

Formal Matters

Claims 1-8, 10-29, 49-50 are pending and under consideration.

Response to Amendment

The rejection of claims 1-29, 49-50 under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement has been obviated by Applicant's amendment and is thus withdrawn.

The rejection of claims 1-29, 49-50 under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps, has been obviated by Applicant's amendment and is thus withdrawn.

New issues are set forth below.

Claim Rejections - 35 USC § 112 first paragraph

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-8, 10-29, 49-50 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a method of characterizing the effect on transmembrane voltage of a candidate compound, does not reasonably provide enablement for a method of characterizing the biological activity of a candidate compound. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to practice the invention commensurate in scope with these claims.

Art Unit: 1646

The claims are drawn to method of characterizing the biological activity of a candidate compound. There is no definition of what the term "biological activity" encompasses (see Rejection under 35 USC 112 second paragraph, *infra*). Since the term "biological activity" is indefinite, it would require undue experimentation for one of skill in the art to determine which biological activity is to be measured, then perform the method if screening.

Claim Rejections - 35 USC § 112 second paragraph

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-8, 10-29, 49-50 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-8, 10-29, 49-50 are is vague and indefinite in the recitation of the term "biologically active". The term "biologically active" is not defined by the claim, and the Specification gives no definition of what this activity is. Various biological activities can be attributed to a peptide. For example, "activity" could constitute transportation throughout a cell, alteration of tertiary structure due to changes in pH, ligand binding, or modulation of second messenger effect, etc. 'Activity' could also be referring to the ability of the fragment to stimulate antibody production.

Claims 12-19 recites the limitation "said one or more electrical fields". However, the base claim 1 recites "a series of two or more electric fields", Thus, there is insufficient antecedent basis for this limitation in the claim.

Art Unit: 1646

Conclusion

No claim is allowed.
